

Studio Guide: Connecting to the Wireless Display

The majority of the studios in the Quinn building are enabled with wireless display technology. This means that you can share your laptop or device screen on the studio display without having to use a cabled connection. There are a number of steps you must complete before you can use the wireless display technology. Some of these steps will only need to be completed once. The following guide shows the steps needed for laptops running Windows 10 to connect to the wireless display screens.

Connecting to Eduroam

You must be connected to the Eduroam network in order to use the wireless display. You install and configure the Eduroam client on your laptop or device before you connect to the network. You will only need to perform this action once.

1. Go to the eduroam website http://cat.eduroam.org and click the button on screen that says Click here to download your eduroam installer.

eduroam® provides access to thousands of Wi-Fi hotspots around the world, free of charge. Learn more

2. Next, select UCD from the list of participating organisations. It may help to type the name 'University College Dublin' into the search bar to find UCD quickly.
